Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 July 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6, 8, 10-17, 19, and 21-23 are rejected under 35 U.S.C. 102(e) as being anticipated by *Robinson et al* (US 6,315,723).

Robinson et al anticipates all claimed invention in claims 1-8, 10-19, and 21-23.

Claims 1, 16, and 17: Robinson et al discloses of an ultrasound imaging method where the first T_{S1} and second T_{S2} ultrasound beams are transmitted along a common scanline into a region of interest (ROI) and receiving reflected echoes (R_{L1} and R_{L2} , R_{S3} and R_{S4}) and multiplying (via multipliers 42, 44, and 46) the first and second echoes with weighting factor. The weighting process includes contribution from the number of scanlines used to form the composite image. The weighted echoes of signals are combined or added to form a composite image (col. Col. 5, line 56- col. 6, line 46; col. 9, lines 31-61).

Claims 13: In addition to method above, Robinson et al further discloses of composite scanline formed from ultrasound transmission at different focal depths (col. 1, lines 38-43; col. 4, line 59 – col. 5, line 10).

Art Unit: 3737

Claim 14: Furthermore, Robinson et al discloses of dynamic aperture setting for the transmission parameter to vary the number of transmit elements for each ultrasound transmission (col. 1, lines 20-35).

Claims 2-6, 8, 10-12, 15, 19, and 21-23: Robinson et al discloses of utilizing different parameters of transmission and corresponding reception condition such as focal depth, transmission frequency, aperture size (number of transmitting elements), number of scanlines, time delay, and length of the transmit pulse (col. 1, lines 20-43; col. 3, lines 29-52).

Claims 7 and 18: Robinson et al

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Robinson et al as applied to claims 1 and 17 above, and further in view of ***Hossack et al*** (US 5,873,830).

Robinson et al substantially discloses of all claimed invention in claims 7 and 18.

Hossack et al further teaches that the compounded or composite images formed from multiple transmission/receptions method uses varying transmission and reception parameter including frequencies, focal depths as well as bandwidth. Therefore, it would have been obvious to one having an ordinary skill in the art at the time the invention was made to apply the teachings of Robinson et al to the teachings of Hossack et al to achieve the claimed invention.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Chiao et al (US 6,048,315), *Wright et al* (US 5,793,701), *Entrekin et al* (US 6,530,885), *Jago et al* (US 6,117,081), and *Phillips* (US 6,213,947)

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William Jung whose telephone number is 703-605-4364. The examiner can normally be reached on Mon-Fri 8:30 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dennis Ruhl can be reached on 703-305-2262. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
